- Creative problem solver
- Fast learner
- Passionate and driven

Work Experience

Escape Studios

Senior Software Developer / SysAdmin
Feb 2024 to Present

- Solely responsible for building fully functional official website of the company and there products.
- Developed a Linux server manager capable of automating game server deployment. The tool handles the entire process, including file upload, extraction, permission configuration, server initiation, and real-time console output monitoring.

MoreFun Studios

Discord Bot Developer / Fandom Wiki Editor
Mar 2023 to Present

- I focus on automating and interlinking fandom wikis while implementing game-related content to drive strategic marketing initiatives aimed at expanding the player base through bots.
- I'm responsible for developing a comprehensive website that enables admins to oversee, manage, control, and analyze the bot's functionality.
- I've been tasked with building and maintaining the game's fandom wiki.

Nuverse

Fandom Wiki developer (Full time)
March 2023 to September 2023

- I've been tasked with building and maintaining the game's fandom wiki.
- Using HTML, CSS, and Wikia on the Fandom platform, I've created and curated pages while integrating Facebook, X, and Discord widgets to enhance user engagement and accessibility.
